

Camo Net

Equipment

1 camouflage net for crawling under
10 bungee guys
10 pegs

Check equipment against this at the start and end of your session and report anything missing or broken.

Leader requirements:

One competent person must take overall charge of the activity and ensure the equipment is in good order and used in a safe manner.

Guide to use of equipment:

Locate the site for the camo net and attach the bungee guys where needed using the blue holdon clips. Extend the guys with rope if needed. **DO NOT MAKE HOLES IN THE CAMO NET**

The holdon clips can be released by pressing the ratchet and sliding the two parts of the clip. The plastic sheet is inserted between the flat faces of the clip and the clip is slid shut. By holding the

main body of the clip and pulling on the guy line the clip will close tightly gripping the plastic sheet.

Please remove the bungee guy lines by opening the holdon clip when you store the kit.

Guide to risk for your risk assessment:

Ensure equipment is used sensibly and observed when people are under the net
Bungee ropes are not to be used to hit people
